

CAR Rental Website

By Donghyeok Seo and Wei Wang

Purpose:

This project is to implement a car-rental website (<https://www.enterprise.ca/en/home.html>).

It provides information of available cars by car types, prices and different cities. User can select cars and date/time. Admin can get the analysis from database based on user activities.

Major features:

User can search cars from cities.

User can select store from map.

User can schedule reservation.

User can modify/cancel reservation.

Company can push notification/advertisement to user.

Company can analyze data.

Technologies:

Google map API

Websocket for message pushing.

Facebook graph API.

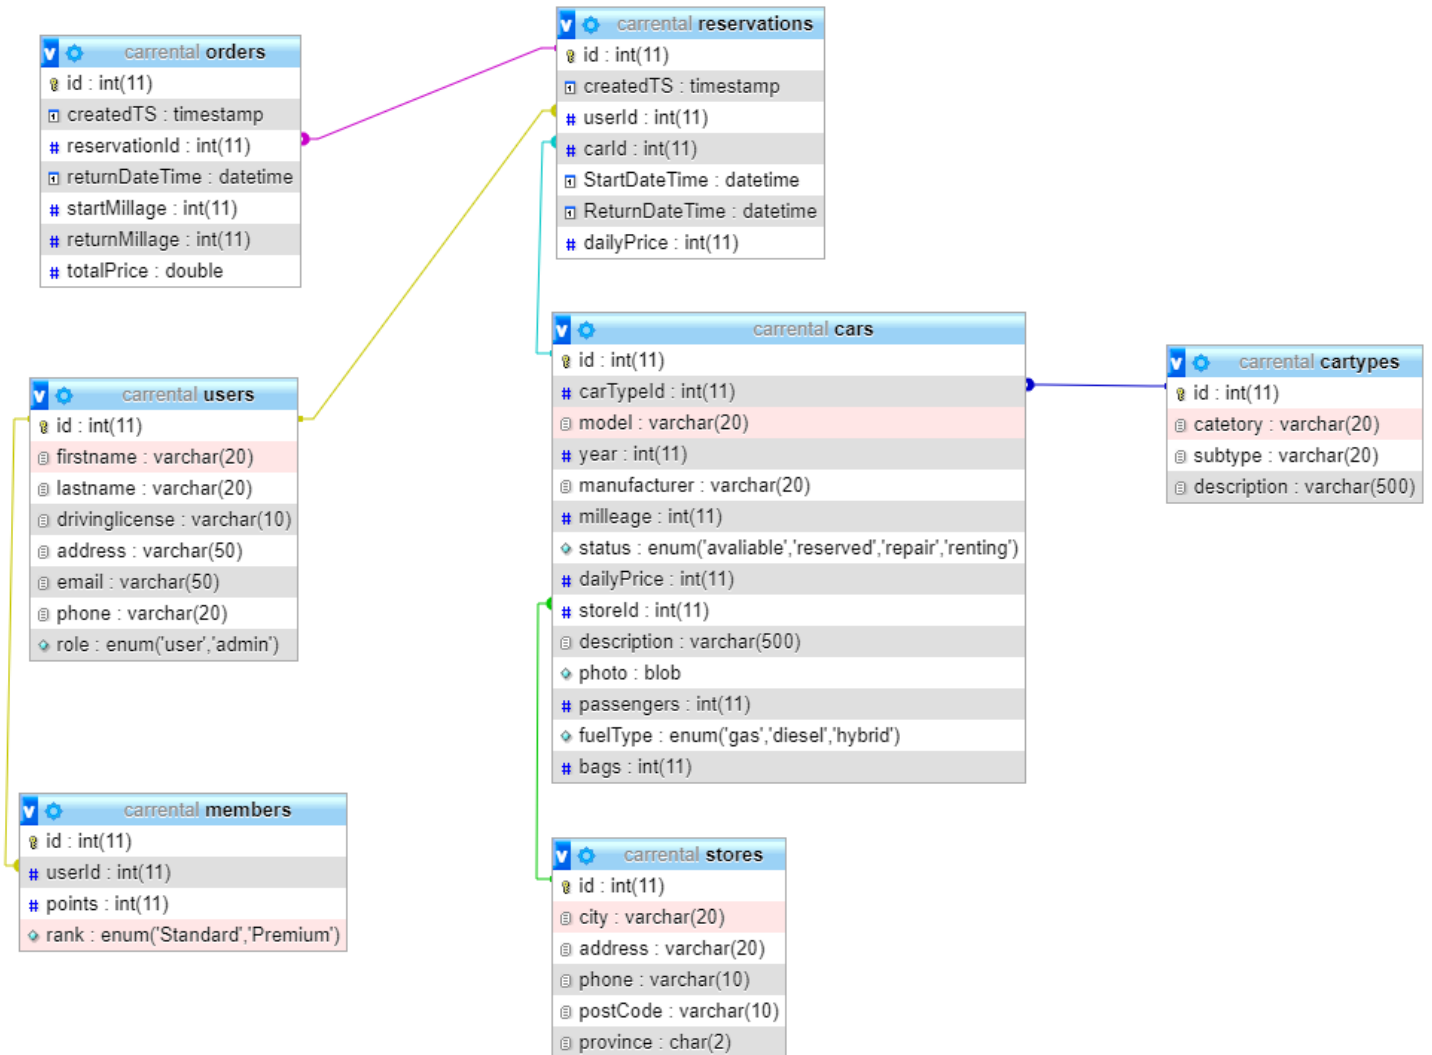

Email verification/reset password,

HTML canvas library

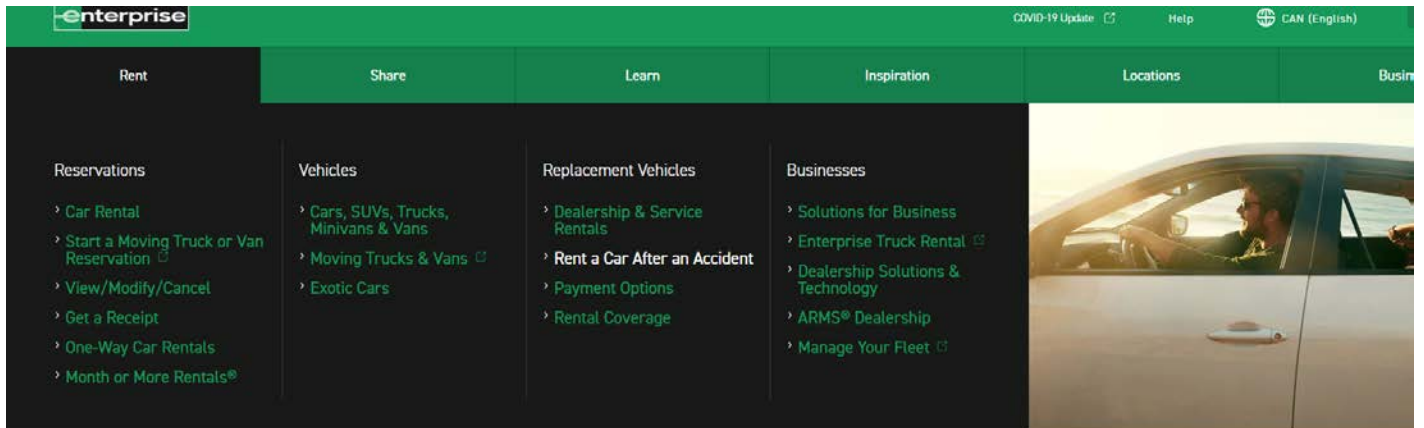

Scheduler API

Unit test
